

[About](#)   [Projects](#)   [Contact](#)

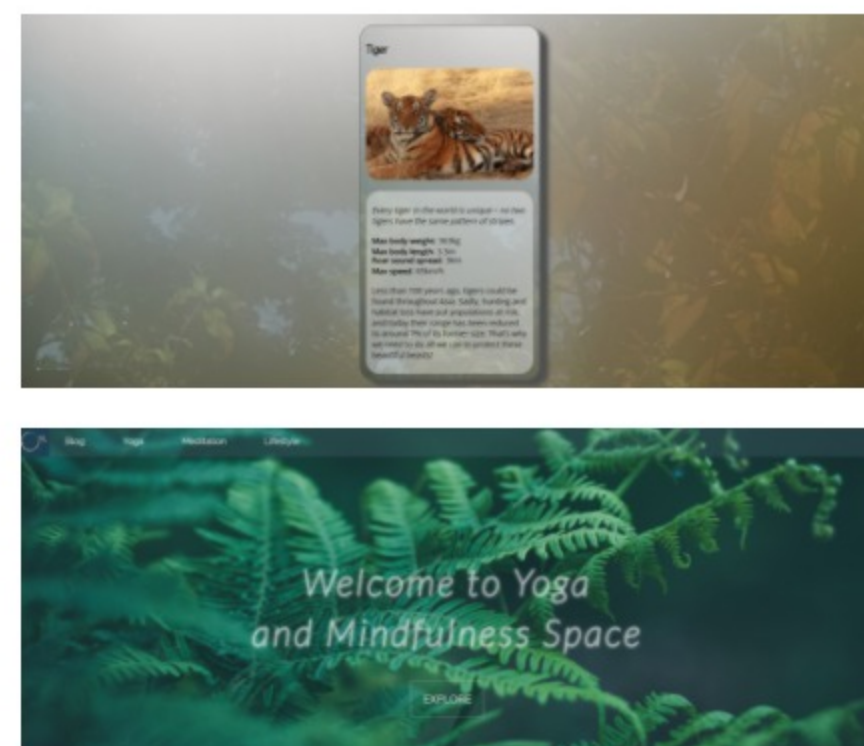

## Hi, I'm Zoe. I build websites...

...and I love it! I use HTML5, CSS, and JavaScript to create responsive, mobile friendly and clean websites. As I truly admire the power of visual design I also use Adobe programs like Illustrator and Photoshop and I make digital images on the Wacom tablet. I'm also the yoga and nature lover and between coding I move my body with breath and travel.
